Other Details:	
Brief Description of Business (10 words): Groundworks Contractor- Turnover £20m - Midlands Construction Projects	
Type of Work Involved (100 words)  Project Manager for Parkstone Construction (major part of group), currently subcontracting on £375m rebuild of Coventry Walsgrave Hospital. At present I have approximately 80 employees ranging from general groundworkers to drainlayers, machine (excavator) drivers, carpenters and steelfixers, on site under my direct control. Also 20 of my own subcontractors ranging from tarmacers, fencers, diamond drillers, directional drillers and deep drainage gangs. Typically, the company secures work packages ranging from hospitals, new supermarkets, new offices, football stadiums etc, and carries out the earthworks, drainage, foundations, floor slabs and then completes the hard landscaping, carparks, footpaths, paved areas and topsoiled areas. Our work area is generally Birmingham, Coventry, Leicester, Northampton, Kettering, but occasionally we stray outside, ie currently doing Sainsbury extension in Norwich.
